A Composition−adjusted primary models
Zero of six pass Bonferroni; 95% intervals are unadjusted
Immune / IFN
Proliferation
Stromal / EMT
DNA repair
Hypoxia / stress
Apoptosis
0.5
1.0
1.5
2.0
2.5
Odds ratio per residual SD (95% CI)
B Models before composition adjustment
For comparison only; primary inference remains adjusted
Immune / IFN
Proliferation
Stromal / EMT
DNA repair
Hypoxia / stress
Apoptosis
0.5
